Location/Description

The city of Chaska is on the Minnesota River in Carver County in south central Minnesota. The project consists of approximately 1.1 miles of upgraded levee and 1.5 miles of new levee, with appropriate landward drainage facilities and a storm water pumping station. Creek diversion and bypass channels are built on Chaska Creek (1.1 miles) and East Creek (one mile). Nine bridges were removed or replaced or both. Approximately 2.9 miles of paved recreation trails on top of the levee and around Courthouse Lake are part of the project.

Status

Funds were included in the 1988 appropriations act to initiate construction. All construction is now complete. A project dedication ceremony was held on July 28, 1998

Authority

Section 102 of the Water Resources Development Act of 1976 (Public Law 94-587).

Fiscal

Summary of Financial Data

Federal Cost	\$31,139,000
Non-Federal Cost	12,558,000
Total Project Cost	\$43,697,000
